

Panacea for women infertility

PRE CONGRESS COURSE (HALL A)

FRIDAY 20 | 10 | 2023

The cutting edge in receptivity treatment

The Role of Platelet – Rich Plasma in IVF / RIF

Course description: Assisted reproduction techniques are widely used nowadays in order to overcome infertility problems. A major problem accounted is the non-receptive endometrium and a promising new tool for overcoming it, is the application of autologous platelet rich plasma (PRP). This course will define PRP, point out the endometrial receptivity problems and their possible causes and present experimental PRP application benefits to date. More importantly, there will be a *live demonstration* of the optimized PRP isolation technique and a opportunity for hands on practice.

Target audience: Clinicians - reproductive endocrinologists, fertility specialists, embryologists, biologists, scientists and all other professionals involved in infertility treatment.

Educational expert outcomes: at the conclusion of this course, participants should be able to understand the benefits and possible applications of PRP in their clinical practice as well as perform the PRP isolation procedure.

**Course coordinators: Antonios Makrigiannakis,
Tatjana Motrenko**
